NAME

strace-log-merge - merge strace -ff -tt output

SYNOPSIS

```
strace-log-merge STRACE_LOG
strace-log-merge --help
```

DESCRIPTION

strace-log-merge merges the output of **strace -ff -tt[t]** command, prepending PID to each line and sorting the result using time stamp as a key.

OPTIONS

--help Show program usage and exit.

STRACE LOG

Output file name prefix of files produced by a **strace -ff -tt[t]** command.

EXIT STATUS

0 Success

Non-zero

Error occurred: either no argument specified (in that case a usage is printed), or something went wrong during the processing of *STRACE_LOG*.* files.

USAGE EXAMPLE

```

NOTES

strace-log-merge does not work well with strace logs generated by strace -tt invocation that pass midnight, as those lack the information required for the proper sorting. Employing the -ttt option in the respective strace invocation should solve the problem.

BUGS

strace-log-merge does not perform any checks whether the files specified are in the correct format and implies that only files from a single *strace* session match *STRACE_LOG*.* glob pattern.

HISTORY

The initial version of strace-log-merge was written by Denys Vlasenko in 2012.

REPORTING BUGS

Problems with **strace-log-merge** should be reported to the **strace** mailing list at <strace-devel@lists.strace.io>.
