#### **NAME**

asin, asinf, asinl – arc sine function

# **SYNOPSIS**

```
#include <math.h>
double asin(double x);
float asinf(float x);
long double asinl(long double x);
Link with -lm.
```

Feature Test Macro Requirements for glibc (see **feature\_test\_macros**(7)):

```
asinf(), asinl():
```

```
_ISOC99_SOURCE || _POSIX_C_SOURCE >= 200112L || /* Since glibc 2.19: */ _DEFAULT_SOURCE || /* Glibc versions <= 2.19: */ _BSD_SOURCE || _SVID_SOURCE
```

# **DESCRIPTION**

These functions calculate the principal value of the arc sine of x; that is the value whose sine is x.

#### **RETURN VALUE**

On success, these functions return the principal value of the arc sine of x in radians; the return value is in the range [-pi/2, pi/2].

If x is a NaN, a NaN is returned.

If x is +0 (-0), +0 (-0) is returned.

If x is outside the range [-1, 1], a domain error occurs, and a NaN is returned.

# **ERRORS**

See **math\_error**(7) for information on how to determine whether an error has occurred when calling these functions.

The following errors can occur:

Domain error: x is outside the range [-1, 1]

errno is set to EDOM. An invalid floating-point exception (FE\_INVALID) is raised.

# **ATTRIBUTES**

For an explanation of the terms used in this section, see **attributes**(7).

Interface	Attribute	Value
<pre>asin(), asinf(), asinl()</pre>	Thread safety	MT-Safe

#### **CONFORMING TO**

C99, POSIX.1-2001, POSIX.1-2008.

The variant returning double also conforms to SVr4, 4.3BSD, C89.

# **SEE ALSO**

```
acos(3), atan(3), atan(3), casin(3), cos(3), sin(3), tan(3)
```
