### **NAME**

```
psignal, psiginfo - print signal message
```

### **SYNOPSIS**

```
#include <signal.h>
    void psignal(int sig, const char *s);
    void psiginfo(const siginfo_t *pinfo, const char *s);
    extern const char *const sys_siglist[];
Feature Test Macro Requirements for glibc (see feature_test_macros(7)):
    psignal():
      Since glibc 2.19:
         _DEFAULT_SOURCE
       Glibc 2.19 and earlier:
         _BSD_SOURCE || _SVID_SOURCE
    psiginfo(): _POSIX_C_SOURCE >= 200809L
    sys_siglist:
      Since glibc 2.19:
         _DEFAULT_SOURCE
      Glibc 2.19 and earlier:
         _BSD_SOURCE
```

#### DESCRIPTION

The **psignal**() function displays a message on *stderr* consisting of the string s, a colon, a space, a string describing the signal number sig, and a trailing newline. If the string s is NULL or empty, the colon and space are omitted. If sig is invalid, the message displayed will indicate an unknown signal.

The **psiginfo**() function is like **psignal**(), except that it displays information about the signal described by *pinfo*, which should point to a valid *siginfo\_t* structure. As well as the signal description, **psiginfo**() displays information about the origin of the signal, and other information relevant to the signal (e.g., the relevant memory address for hardware-generated signals, the child process ID for **SIGCHLD**, and the user ID and process ID of the sender, for signals set using **kill**(2) or **sigqueue**(3)).

The array sys\_siglist holds the signal description strings indexed by signal number.

### **RETURN VALUE**

The **psignal**() and **psiginfo**() functions return no value.

### **VERSIONS**

The **psiginfo()** function was added to glibc in version 2.10.

# **ATTRIBUTES**

For an explanation of the terms used in this section, see **attributes**(7).

Interface	Attribute	Value
psignal(), psiginfo()	Thread safety	MT-Safe locale

#### **CONFORMING TO**

POSIX.1-2008, 4.3BSD.

## **BUGS**

In glibc versions up to 2.12, **psiginfo()** had the following bugs:

- \* In some circumstances, a trailing newline is not printed.
- \* Additional details are not displayed for real-time signals.
