NAME

tipc-media - list or modify media properties

SYNOPSIS

```
tipc media set \{ priority PRIORITY | tolerance TOLERANCE | window WINDOW \} media MEDIA tipc media get \{ priority | tolerance | window \} media MEDIA tipc media list
```

OPTIONS

Options (flags) that can be passed anywhere in the command chain.

-h, --help

Show help about last valid command. For example **tipc media --help** will show media help and **tipc --help** will show general help. The position of the option in the string is irrelevant.

DESCRIPTION

Media properties

priority

Default link priority inherited by all bearers subsequently enabled on a media. For more info about link priority see **tipc-link**(8)

tolerance

Default link tolerance inherited by all bearers subsequently enabled on a media. For more info about link tolerance see **tipc-link**(8)

window

Default link window inherited by all bearers subsequently enabled on a media. For more info about link window see **tipc-link**(8)

EXIT STATUS

Exit status is 0 if command was successful or a positive integer upon failure.

SEE ALSO

tipc(8), tipc-bearer(8), tipc-link(8), tipc-nametable(8), tipc-node(8), tipc-peer(8), tipc-socket(8)

REPORTING BUGS

Report any bugs to the Network Developers mailing list <netdev@vger.kernel.org> where the development and maintenance is primarily done. You do not have to be subscribed to the list to send a message there.
