NAME

XtSessionGetToken, XtSessionReturnToken - token management for checkpointing

SYNTAX

XtCheckpointToken XtSessionGetToken(Widget w, int type); void XtSessionReturnToken(XtCheckpointToken token);

ARGUMENTS

w Specifies the session widget.

type Specifies the value in the type field of the token.

token Specifies the token to be returned.

DESCRIPTION

The **XtSessionGetToken** function will return NULL if the checkpoint operation instigated by the session manager is not currently under way.

To indicate the completion of a deferred save operation and to return the checkpoint token use **XtSession-ReturnToken**.
