NAME
seahorse − Passwords and Keys

SYNOPSIS
seahorse [OPTION...]

DESCRIPTION
Seahorse is a front end for GnuPG - the Gnu Privacy Guard program - that integrates to the GNOME desktop. It is a tool for secure communications and data storage. Data encryption and digital signature creation can easily be performed through a GUI and Key Management operations can easily be carried out through an intuitive interface.

OPTIONS
−?, **−−help**
        Show help options

−−help−all
        Show all help options
