NAME
       sbsign - UEFI secure boot signing tool

SYNOPSIS
       sbsign [*options*] *--key ‹keyfile› --cert ‹certfile› ‹efi-boot-image›*

DESCRIPTION
       Sign an EFI boot image for use with secure boot.

OPTIONS
       −−engine ‹eng›
              use the specified engine to load the key

       −−key ‹keyfile›
              signing key (PEM−encoded RSA private key)

       −−cert ‹certfile›
              certificate (x509 certificate)

       −−detached
              write a detached signature, instead of a signed binary

       −−output ‹file›
              write signed data to ‹file› (default ‹efi−boot−image›.signed, or ‹efi−boot−image›.pk7 for de-
              tached signatures)
