NAME
      gnome-session-quit – End the current GNOME session

SYNOPSIS
      gnome-session-quit [−−logout|−−power-off|−−reboot] [−−force] [−−no-prompt]

DESCRIPTION
      The *gnome-session-quit* program can be used to end a GNOME session.

OPTIONS
      The following options are supported:

      --logout
            Prompt the user to confirm logout. This is the default behavior.

      --power-off
            Prompt the user to confirm system power off.

      --reboot
            Prompt the user to confirm system reboot.

      --force   Ignore any inhibitors.

      --no-prompt
            End the session without user interaction. This only works with *--logout*.

BUGS
      If you find bugs in the *gnome-session-quit* program, please report these on https://bugzilla.gnome.org.
