NAME
chktrust − Check the trust of a PE executable.

SYNOPSIS
chktrust [options] filename

DESCRIPTION
Verify if an PE executable (CLR assembly, Win32 EXE or DLL) has a valid Authenticode(r) signature that can be traced back to a trusted certificate authority (CA). This means that

(a) the signature is valid (i.e. file integrity) and,

(b) the code-signing certificate can be chained back to one of the
    certificates in the Trust store.

OPTIONS
-q , -quiet
Quiet mode. Limited display on console.

-v , -verbose
Verbose mode. More details displayed on the console.

-help , -h , -? , /?
Display help about this tool.

KNOWN RESTRICTIONS
chktrust cannot validate Authenticode signatures on CAB files.
