NAME

dh_autotools−dev_updateconfig − update config.sub and config.guess

SYNOPSIS

dh_autotools−dev_updateconfig [*debhelper options*]

DESCRIPTION

Deprecated: dh_autotools−dev_updateconfig and dh_autotools−dev_restoreconfig are deprecated and replaced by *dh_update_autotools_config* (1) and *dh_clean* (1) from debhelper. Please replace all uses of dh_autotools−dev_updateconfig with dh_update_autotools_config and then remove any use of dh_autotools−dev_restoreconfig.

dh_autotools−dev_updateconfig replaces all occurances of **config.sub** and **config.guess** in the source tree by the up-to-date versions found in the autotools-dev package. The original files are backed up under the names **config.sub.dh−orig** and **config.guess.dh−orig**.

EXAMPLES

dh_autotools−dev_updateconfig is usually called indirectly in a rules file via the dh command.

```
%:
        dh $@ --with autotools_dev
```

It can also be direcly called at the start of the build (or configure) rule.

```
build:
        dh_autotools-dev_updateconfig
        ./configure
        $(MAKE)
```

SEE ALSO

debhelper (7), *dh* (1).

This program is meant to be used together with debhelper.
