NAME
> gnome-session-properties – Configure applications to start on login

SYNOPSIS
> **gnome-session-properties**

DESCRIPTION
> The *gnome-session-properties* program enables the users to configure what applications should be started on login, in addition to the default startup applications configured on the system.
>
> It also proposes an interface to save a snapshot of the currently running applications so that they can automatically be restored to their current state on your next GNOME session.

BUGS
> If you find bugs in the *gnome-session-properties* program, please report these on https://bugzilla.gnome.org.
