NAME

systemd-localed.service, systemd-localed − Locale bus mechanism

SYNOPSIS

systemd−localed.service

/lib/systemd/systemd−localed

DESCRIPTION

systemd−localed is a system service that may be used as mechanism to change the system locale settings, as well as the console key mapping and default X11 key mapping. systemd−localed is automatically activated on request and terminates itself when it is unused.

The tool **localectl**(1) is a command line client to this service.

See the **developer documentation**[1] for information about the APIs systemd−localed provides.

SEE ALSO

systemd(1), **locale.conf**(5), **vconsole.conf**(5), **localectl**(1), **loadkeys**(1)
