NAME

FcDirScan − scan a font directory without caching it

SYNOPSIS

#include <fontconfig/fontconfig.h>

FcBool FcDirScan (FcFontSet *set**, FcStrSet ***dirs**, FcFileCache ***cache**, FcBlanks ***blanks**, const Fc-Char8 ***dir**, FcBool** force**);**

DESCRIPTION

If *cache* is not zero or if *force* is FcFalse, this function currently returns FcFalse. Otherwise, it scans an entire directory and adds all fonts found to *set*. Any subdirectories found are added to *dirs*. Calling this function does not create any cache files. Use FcDirCacheRead() if caching is desired.
