NAME

pull-debian-debdiff − find, download, and generate a debdiff

SYNOPSIS

pull-debian-debdiff [*options*] <*package*> <*version*> [*distance*]

DESCRIPTION

pull-debian-debdiff attempts to find and download a specific version of a Debian package and its immediate parent to generate a debdiff.

OPTIONS

package
> The source package to download and diff.

version The most recent of the two versions you want to diff.

distance
> If specified (default **1**), the debdiff is against that many versions previous.

−h, **−−help**
> Display the usage instructions and exit.

−f, **−−fetch**
> Simply download the specified version and exit.

−d *DEBIAN_MIRROR*, **−−debian−mirror**=*DEBIAN_MIRROR*
> Use the specified mirror. Should be in the form **http://ftp.debian.org/debian**. If the package isn't found on this mirror, **pull−debian−source** will fall back to the default mirror.

−s *DEBSEC_MIRROR*, **−−debsec−mirror**=*DEBSEC_MIRROR*
> Use the specified Debian security mirror. Should be in the form **http://security.debian.org**. If the package isn't found on this mirror, **pull−debian−source** will fall back to the default mirror.

−−no−conf
> Do not read any configuration files, or configuration from environment variables.

ENVIRONMENT

All of the **CONFIGURATION VARIABLES** below are also supported as environment variables. Variables in the environment take precedence to those in configuration files.

CONFIGURATION VARIABLES

The following variables can be set in the environment or in **ubuntu−dev−tools**(5) configuration files. In each case, the script−specific variable takes precedence over the package−wide variable.

PULL_DEBIAN_DEBDIFF_DEBIAN_MIRROR, **UBUNTUTOOLS_DEBIAN_MIRROR**
> The default value for **−−debian−mirror**.

PULL_DEBIAN_DEBDIFF_DEBSEC_MIRROR, **UBUNTUTOOLS_DEBSEC_MIRROR**
> The default value for **−−debsec−mirror**.

SEE ALSO

debdiff(1), **dget**(1), **pull−debian−source**(1), **ubuntu−dev−tools**(5)
