NAME

aseqdump − show the events received at an ALSA sequencer port

SYNOPSIS

aseqdump [−*p client:port,...*]

DESCRIPTION

aseqdump is a command-line utility that prints the sequencer events it receives as text.

To stop receiving, press Ctrl+C.

OPTIONS

−h,−−help
> Prints a list of options.

−V,−−version
> Prints the current version.

−l,−−list
> Prints a list of possible input ports.

−p,−−port=client:port,...
> Sets the sequencer port(s) from which events are received.
>
> A client can be specified by its number, its name, or a prefix of its name. A port is specified by its number; for port 0 of a client, the ":0" part of the port specification can be omitted.
