NAME

HTTP::Cookies::Netscape – Access to Netscape cookies files

VERSION

version 6.04

SYNOPSIS

```
use LWP;
use HTTP::Cookies::Netscape;
$cookie_jar = HTTP::Cookies::Netscape->new(
  file => "c:/program files/netscape/users/ZombieCharity/cookies.txt",
);
my $browser = LWP::UserAgent->new;
$browser->cookie_jar( $cookie_jar );
```

DESCRIPTION

This is a subclass of `HTTP::Cookies` that reads (and optionally writes) Netscape/Mozilla cookie files.

See the documentation for HTTP::Cookies.

CAVEATS

Please note that the Netscape/Mozilla cookie file format can't store all the information available in the Set–Cookie2 headers, so you will probably lose some information if you save in this format.

At time of writing, this module seems to work fine with Mozilla Phoenix/Firebird.
