NAME

      XtReservePropertyAtom, XtReleasePropertyAtom − maintain a cache of property atoms

SYNTAX

      Widget XtReservePropertyAtom(Widget *w*);

      void XtReleasePropertyAtom(Widget *w*, Atom *atom*);

ARGUMENTS

      w   Specifies the widget used to reserve the atom.

      atom   Specifies the atom whose reservation is to be released.

DESCRIPTION

      XtReservePropertyAtom returns an atom that may be used for properties in conjunction with conversion requests from widget *w*. The atom returned will be unique for the display of the widget specified.
