NAME
      FcGetDefaultLangs − Get the default languages list

SYNOPSIS
      #include <fontconfig/fontconfig.h>

      FcStrSet * FcGetDefaultLangs (void);

DESCRIPTION
      Returns a string set of the default languages according to the environment variables on the system. This
      function looks for them in order of FC_LANG, LC_ALL, LC_CTYPE and LANG then. If there are no
      valid values in those environment variables, "en" will be set as fallback.

SINCE
      version 2.9.91
