NAME

Glib::Param::UInt − Wrapper for uint parameters in GLib

HIERARCHY

```
Glib::ParamSpec
+----Glib::Param::UInt

Glib::ParamSpec
+----Glib::Param::UChar

Glib::ParamSpec
+----Glib::Param::ULong
```

DESCRIPTION

This page documents the extra accessors available for all of the unsigned integer type paramspecs: UChar, UInt, and ULong. Perl really only supports full-size integers, so all of these methods return UVs; the distinction of integer size is important to the underlying C library and also determines the data value range.

METHODS

unsigned = $pspec−**>get_maximum**
unsigned = $pspec−**>get_minimum**

SEE ALSO

Glib, Glib::ParamSpec, Glib::ParamSpec
