NAME
    xssstate − display X screensaver state

SYNOPSIS
    xssstate [−**i**] [−**s**] [−**t**] [−**v**]

DESCRIPTION
    xssstate will display the state of the X screensaver extension. See below what can be gathered.

OPTIONS
    −**i**   show the idle time of X11, in milliseconds.

    −**s**   show the current state of the X screensaver. There is **on** for the screensaver being active at the moment, **off** for the screensaver being off and **disabled** for the screensaver being disabled.

    −**t**   will show the time that needs to be waited until the screensaver should be activated, in milliseconds.

    −**v**   show version information
