## NAME

git-verify-commit − Check the GPG signature of commits

## SYNOPSIS

*git verify−commit* <commit>...

## DESCRIPTION

Validates the GPG signature created by *git commit −S*.

## OPTIONS

−−raw

Print the raw gpg status output to standard error instead of the normal human−readable output.

−v, −−verbose

Print the contents of the commit object before validating it.

<commit>...

SHA−1 identifiers of Git commit objects.

## GIT

Part of the **git**(1) suite
