NAME

check-language-support − returns the list of missing packages in order to provide a complete language environment

SYNOPSIS

check-language-support [*options*]

OPTIONS

−h, **−−help**

show this help message and exit

−l LANGUAGE, **−−language**=*LANGUAGE*

target language code - if omitted, check for all languages on the system

−d DATADIR, **−−datadir**=*DATADIR*

use an alternative data directory instead of the default **/usr/share/language−selector**

−a, **−−all**

check all available languages

−−show−installed

show installed packages as well as missing ones
