NAME

pdfunite − Portable Document Format (PDF) page merger

SYNOPSIS

pdfunite [options] *PDF-sourcefile1..PDF-sourcefilen PDF-destfile*

DESCRIPTION

pdfunite merges several PDF (Portable Document Format) files in order of their occurrence on command line to one PDF result file.

Neither of the PDF-sourcefile1 to PDF-sourcefilen should be encrypted.

OPTIONS

−v   Print copyright and version information.

−h   Print usage information. (**−help** and **−−help** are equivalent.)

EXAMPLE

pdfunite sample1.pdf sample2.pdf sample.pdf

merges all pages from sample1.pdf and sample2.pdf (in that order) and creates sample.pdf
