NAME
>   update−default−wordlist − update default wordlist

SYNOPSIS
>   `update-default-wordlist [--skip-symlinks] [--triggered]`

DESCRIPTION
>   WARNING: Not to be used from the command line unless you know very well what you are doing.
>
>   This program is intended to be called from wordlist package postinst, from **select-default-wordlist** or from dictionaries-common postinst.
>
>   When called under dpkg control with the **−−trigger** option the script is run normally, otherwise the dictionaries-common **update-default-wordlist** trigger is enabled for later run.
>
>   With the **−−skip−symlinks** option the symlinks setting is skipped.
>
>   When run normally (from the command line or with **−−trigger**) this script rebuilds the info at */var/cache/dictionaries−common/wordlist.db* after files under */var/lib/dictionaries−common/wordlist*, reads the system default from the debconf database and unless disabled, set default symlinks in */etc/dictionaries−common* pointing to the appropriate files in */usr/share/dict/*.

OPTIONS
>   `--skip-symlinks` Do not try to set symlinks at /etc/dictionaries-common dir.
>   `--triggered`   Run all the code instead of trying to enable
>   update-default-wordlist trigger
