NAME

manpage-alert − check for binaries without corresponding manpages

SYNOPSIS

manpage-alert [*options*] [*paths*]

DESCRIPTION

manpage-alert searches the given list of paths for binaries without corresponding manpages.

If no *paths* are specified on the command line, the path list */bin /sbin /usr/bin /usr/sbin /usr/games* will be assumed.

OPTIONS

−h,**−−help**
> Show a summary of options.

−V,**−−version**
> Show version and copyright information.

−f,**−−file**
> Show filenames of missing manpages without any leading text.

−p,**−−package**
> Show filenames of missing manpages with their package name.

−n,**−−no−stat**
> Do not show statistics at the end.

AUTHOR

manpage-alert was written by Branden Robinson and modified by Julian Gilbey <jdg@debian.org> and Adam D. Barratt <debian−bts@adam−barratt.org.uk> (who also wrote this manpage) for the devscripts package.

This manpage and the associated program are licensed under the terms of the GPL, version 2 or later.
