NAME
fzputtygen − SFTP private key converter of FileZilla

DESCRIPTION
fzputtygen is part of FileZilla. It is used to convert private keys from OpenSSH or ssh.com format into a format understood by fzsftp. It usually gets called by FileZilla and is not intended to be used directly.

fzputtygen is based on the puttygen component of PuTTY.

SUPPORT
Please visit https://filezilla−project.org/ for further information. Report bugs only if you are using the latest version available from the FileZilla website.
