NAME

infotocap − convert a *terminfo* description into a *termcap* description

SYNOPSIS

infotocap [**−v**n *width*] [**−V**] [**−1**] [**−w** *width*] *file ...*

DESCRIPTION

infotocap looks in each given text *file* for **terminfo** descriptions. For each terminfo description found, an equivalent **termcap** description is written to standard output. Terminfo **use** capabilities are translated directly to termcap **tc** capabilities.

−v   print out tracing information on standard error as the program runs.

−V   print out the version of the program in use on standard error and exit.

−1   cause the fields to print out one to a line. Otherwise, the fields will be printed several to a line to a maximum width of 60 characters.

−w   change the output to *width* characters.

FILES

/etc/terminfo   Compiled terminal description database.

NOTES

This utility is actually a link to **tic**, running in −*C* mode. You can use other **tic** options such as **−f** and **−x**.
